### Value priced

Price/performance is perfect for entry-level terminals. Low cost software but top level features

Getting more out of great hardware

# MotoScan® Android

for Android mobile devices

## Ready-made app makes Zebra TC55 a complete tool

This is entry level data capture for everyone. It's easy to understand and easy to handle.

Make your own data capture solution with MotoScan for Android handheld devices.

The most common data capture scenarios are combined in a small software package that gives the end user an easy and simple handling of data collection. It's easy to interface with ERP systems as it operates with a common batch output as a plain text file

Everybody can learn to use the software and it gives good feedback from users. It is easy to modify and adapt the menus and texts to your needs

MotoScan Android is an app made explicitly for data capture tasks. It supports integrated scanners in Zebra/Symbol Android devices and in Datalogic Axist. It also supports scanning using the camera on devices without an integrated scanner, such as consumer devices like Android phones.

It will run on Android devices from version 4.03 and upwards

#### Inventory tool

Inventory is the most common scenario for data capture. Get rid of pen and paper – go digital easily. A small shop/company with a potential for 1-3 terminals. - even in local language and branded with your name

#### Warehouse tool

**Ship:** (Traceability) Scan batch numbers on customer orders  
**Move:** Change location of goods in stock  
**Receive:** Scan incoming goods to pair with Purchase Order

#### Field Service tool

Register parts used for repairs. Service people needs to register materials used for repairs / installation at the customers site. Type the work order no. and scan the spare parts – no paperwork needed.

## How does it work ?

Sign in to your account at the website and create your own data capture scenario. Easy to understand tree-menu and field creator. No programming knowledge needed to get started. Try it out and get convinced

In the setup software you decide how the data format is defined and how many functions the main menu should present to the users

## Demo and Trial mode

An unlicensed version running in demo mode can be downloaded on the website and installed as an APK file on the device or using Zebra AppGallery directly on Zebra/Symbol devices.

Demo means: no connection to back end, no data transfer and the default scenario to play with.

Creating an account on the website and starting a trial period (60 days), will allow you record and transfer 1 record and change and play with one configuration only.

Try it out: [www.moto-scan.com](http://www.moto-scan.com)

Buy the licenses online at the website or contact your distributor if you are a reseller/integrator
